Swami
this is a research seminar. Students will present papers, books and they will produce a publishable paper. The course will involve the PR-2 humanoid robot, which was supposed to be here in December but it is still not here.
There will also be a take home exam.
I don't have a detailed syllabus yet.
Are you a student of John Baras?

Dear Prof.Aloimonos,

I am a graduate student of the ECE department who is considering the course CMSC828T to be taught in the spring'14. I have to decide between this and another course and hence It would be extremely useful if you can put up a rough description of the contents of the course and approximate course load (in terms of the exam and project requirements).

I apologize for the extra trouble.

Sincerely,
Swami Sankaranarayanan
